

CBD Symptoms and Clinical Findings List*

List of **FREQUENTLY** reported symptoms and clinical findings as a result of CBD, regardless of whether someone has been treated. However, not all symptoms listed necessarily result from CBD even if an individual has CBD. Consultation should be made with a physician to determine if they are related to an individual's CBD.

Chest pain

Fatigue

- [National Jewish Health - Fatigue](#)
- [MedlinePlus - Fatigue](#)

Skin rash

- [MedlinePlus - Rashes](#)

Weight loss

- [MedlinePlus - Weight Loss - Unintentional](#)

It is important to note that NOT all individuals with these symptoms will have CBD. These can be symptoms of other conditions which may require medical attention as well. Also, not all people with CBD have all these symptoms.

**For purposes of EEOICPA, while a condition may be a CBD symptom or a clinical finding, DOL has certain medical evidentiary requirements that must be met in order to accept a particular condition.*
