

Illnesses that may develop as a result of CBD*

List of **FREQUENTLY** reported consequential conditions as a result of CBD, regardless of whether someone has been treated. However, not all symptoms listed necessarily result from CBD even if an individual has CBD. Consultation should be made with a physician to determine if they are related to an individual's CBD.

Hypoxemia (*low oxygen levels at exercise, rest or with sleep*)

- [National Jewish Health - Hypoxemia](#)

Pulmonary hypertension

- [National Jewish Health - Pulmonary hypertension](#)

Respiratory failure (*Pneumonia, Acute Bronchitis*)

- [MedlinePlus - Lung Diseases](#)

Right heart failure, Cor pulmonale

- [MedlinePlus - Cor pulmonale](#)
- [National Jewish Health - Cor pulmonale](#)

Deconditioning (*secondary to chronic lung disease*)

- [MedlinePlus - Lung disease](#)

Joint Aches

- [MedlinePlus - Joint Pain](#)

Hyperurecemia, Gout (*high level of uric acid in the blood*)

- [MedlinePlus - Gout](#)

Hypercalcemia/hypercalcuria (*high level of calcium in the blood*)

- [Mayo Clinic - Hypercalcemia](#)

Granulomatous Hepatitis

- [MedlinePlus - Immune System and Disorders](#)

Skin Nodules/Ulceration (*Beryllium Dermatitis*)

- [National Jewish Health - Chronic Beryllium Disease](#)

Aggravation of sleep apnea due to hypoxemia of CBD

- [Medscape - Obstructive Sleep Apnea](#)

Lymphadenopathy (*enlarged lymph nodes*)

- [MedlinePlus - Lymphatic Diseases](#)

Anxiety

- [MedlinePlus - Anxiety](#)

Depression

- [MedlinePlus - Depression](#)

List of **LESS FREQUENTLY** reported consequential conditions as a result of CBD, regardless of whether someone has been treated. However, not all symptoms listed necessarily result from CBD even if an individual has CBD. Consultation should be made with a physician to determine if they are related to an individual's CBD

Acrocyanosis (*discoloration because of the lack of oxygen*)

- [Medical Dictionary - Acrocyanosis](#)

Cyanosis (*lack of oxygen*)

- [National Jewish Health - Cyanosis](#)
- [MedlinePlus - Skin discoloration - bluish](#)
- [Texas Heart Institute - Cyanosis](#)

Heart Failure

- [National Jewish Health - Chronic Beryllium Disease](#)
- [MedlinePlus - Heart Failure](#)

Pneumothorax (*collapsed lung*)

- [National Jewish Health - Pneumothorax](#)
- [National Jewish Health - Chronic Beryllium Disease](#)
- [Mayo Clinic - Pneumothorax](#)

It is important to note that NOT all individuals with these symptoms will have CBD. These can be symptoms of other conditions which may require medical attention as well. Also, not all people with CBD have all these symptoms.

**For purposes of EEOICPA, while a condition may be a consequence of CBD, DOL has certain medical evidentiary requirements that must be met in order to accept a particular consequential condition.*
