

Department of Energy
Washington, DC 20585

SEP 10 2007

The Honorable A.J. Eggenberger
Chairman
Defense Nuclear Facilities Safety Board
625 Indiana Avenue, NW, Suite 700
Washington, DC 20004-2941

Dear Mr. Chairman:

The purpose of this memorandum is to transmit the Office of Environmental Management (EM) Medium Priority Facility Review Reports identified in Enclosure 1 as the next incremental deliverable to satisfy Commitment 8.6.3 of the *Department of Energy Implementation Plan for Defense Nuclear Facilities Safety Board Recommendation 2004-2, Active Confinement Systems*, July 2006.

As over a year has passed since our July 14, 2006, transmittal of the EM priority listing, project changes have affected our original listing. A revised listing is included as Enclosure 2 which gives the current status of all facilities on the original listing. Program Secretarial Officer concurrence and approval of any identified gaps and upgrades, if necessary, will be in accordance with Deliverable 8.6.5.

If you have any comments or feedback, please call me at (202) 586-0738 or Mr. Dae Y. Chung, Deputy Assistant Secretary for Safety Management and Operations, at (202) 586-5151.

Sincerely,

A handwritten signature in black ink that reads "Inés R. Triay".

Dr. Inés R. Triay
Chief Operating Officer for
Environmental Management
