

The Secretary of Energy Washington, DC 20585

January 4, 2007

The Honorable A. J. Eggenberger Chairman Defense Nuclear Facilities Safety Board 625 Indiana Avenue, NW, Suite 700 Washington, DC 20004-2901

Dear Mr. Chairman:

On December 11, 2002, the Defense Nuclear Facilities Safety Board (Board) issued Recommendation 2002-3, *Requirements for the Design, Implementation, and Maintenance of Administrative Controls.* The Department issued its Implementation Plan for Recommendation 2002-3 on June 26, 2003, establishing a methodology and course of actions to address the identified safety issues. The methodology and course of actions included:

- Review of existing requirements and guidance to determine whether supplemental guidance was needed to address safety-related administrative controls, which are now called specific administrative controls (SACs);
- Issuance of supplemental guidance on SACs and provide training;
- Evaluation of safety basis documents to determine whether existing administrative controls met Department expectations and identification of actions to upgrade controls when necessary;
- Evaluation of field implementation of SACs; and
- Strengthening departmental processes to ensure that SACs are properly designed, implemented, and maintained.

The Department has completed its actions and commitments in the Implementation Plan as identified in the enclosure, and we therefore request formal closure of Recommendation 2002-3.

If you have questions, please contact me or Mr. John J. Nichols, Acting Director of the Office of Nuclear Safety and Environmental Policy, at (301) 903-1018.

Sincerely,

Samuel W. Bodman
