

## Department of Energy National Nuclear Security Administration Washington, DC 20585

Washington, DC 20585

The Honorable Peter S. Winokur Chairman Defense Nuclear Facilities Safety Board 625 Indiana Avenue, NW, Suite 700 Washington, DC 20004

Dear Mr. Chairman:

The Department of Energy has completed Deliverable 5.4.3 of the Department's Implementation Plan (IP) for Recommendation 2009-2, Los Alamos National Laboratory Plutonium Facility Seismic Safety. The enclosure documents the basis for completion of the installation of an automatic seismic shutdown capability for non-vital laboratory room electrical loads in the Plutonium Facility that provides an engineered control to reduce laboratory room electrical ignition sources following an earthquake.

If you have any questions, please contact me at (202) 586-4379.

Sincerely,

James J. McConnell

Assistant Deputy Administrator for Nuclear Safety, Nuclear Operations, and Governance Reform

Well

Office of Defense Programs

## memorandum

National Nuclear Security Administration Los Alamos Site Office Los Alamos, New Mexico 87544

DATE: REPLY TO APR 1 4 2011

ATTN OF:

Kevin W. Smith

SUBJECT:

Plutonium Facility Seismic Safety – Recommendation 2009-2, Deliverable 5.4.3

To: James J. McConnell, Assistant Deputy Administrator for Nuclear Safety, Nuclear Operations and Governance Reform, National Nuclear Security Administration, NA-17, HO/FORS

## References:

- 1. U.S. Department of Energy *Implementation Plan for Defense Nuclear Facilities Safety Board Recommendation 2009-2*, July 2010 (LASO COR-SO-3.9.2011-328833)
- 2. LANS letter AD-NHHO:11-063, from Robert L. McQuinn, AD-NHHO, LANS, to Charles Keilers, AM-SO, LASO, Subject: "Submittal of Evidence for Early Completion of Milestone 5.4.3 of DOE Implementation Plan for DNFSB 2009-02, FY11 PBI 7.4.2, 7.4.3, and 18.4A,", dated February 23, 2011 (LASO COR-FO-2.24.2011-325583)

Deliverable 5.4.3 of Reference (1) is completed. Reference (2) documents the completion of the installation of an automatic seismic shutdown capability for Plutonium Facility non-vital laboratory room electrical loads; this capability provides an engineered control to reduce laboratory room electrical ignition sources.

The installation is complete and has passed functional testing. The laboratory is tracking the remaining actions required to credit the system as a safety-class engineered control, including but not limited to: completing relay shaker-table testing, developing maintenance and calibration requirements, updating drawings and maintenance documentation, and updating the safety basis.

If you have any questions regarding this memorandum, you may contact C. Keilers at (505) 606-1944.

Kevin W. Smith

Manager
